

Title : Reorganizing Database Objects Using Variable Length Keys
Inventor : Christopher Y. Blaicher
Docket # : 149-0105US Customer # : 29855
Patent # : 7,496,572 Issued : February 24, 2009

REQUEST FOR CERTIFICATE OF CORRECTION

Commissioner:

Upon review of the above-identified patent, typographical errors on the part of the Patent Office have been detected. Correction is respectfully requested as per the attached Certificate of Correction.

With respect to the correction in column 7 line 9 (the fourth clause in independent claim 1), remove "the". The claim should read:

1. A data sort method, comprising:

obtaining a plurality of data records and, for each data record

extracting key information,

expanding the extracted key information, and

storing the expanded key information in a key record, wherein the
expanded key information is not stored in intermediate storage;

sorting the plurality of key records based on the expanded key information;

reorganizing the plurality of data records to correspond to the order of the sorted
plurality of key records; and

storing the reorganized plurality of data records without their associated
expanded key information to a working storage.

Pursuant to 35 U.S.C. 254 and 37 C.F.R. 1.322, no fees are believed to be due. If this is incorrect, the Commissioner is authorized to deduct the necessary charges from Deposit Account 501922/149-0105US.
